

As Fuzul Holding, our aim is to ensure the security of information assets, related business processes and locations used within the scope of information security, taking into account the principles of confidentiality, integrity and accessibility.

Our Information Security Management System (ISMS) guarantees that our activities within its scope are carried out in accordance with the ISO 27001:2013 standard.

Our Information Security Management System Policy consists of

- Protecting the availability, integrity and confidentiality of information assets,
- Ensuring the confidentiality of information and that only the authorities can access the information,
- Protecting the reliability and reputation of the institution,
- Fulfilling the conditions stipulated by national and international laws, standards and procedures on information security issues,
- Providing secure access to information assets of the employees and business partners of the institution,
- Controlling storing, transmitting, changing, accessing, processing activities to protect information assets,
- Ensuring the establishment of in-process controls with the principle of separation of duties,
- Evaluating any risks that can jeopardize the information assets by the organization and its stakeholders and reducing the impact of information security threats.,
- Ensuring business continuity and sustainability,
- Announcing this policy to all our employees and providing the necessary resources and training for the implementation of the policy,
- Applying the necessary sanctions in case of violation of information security,
- Conducting internal inspections and considering the results of these inspections in management review meetings in monitoring compliance and continuous improvement with the Information Security Management System,
- Is committed to maintaining and improving the level of information security with the established control infrastructure.
